90008-55	55 Gallon Drum	500 lbs.

*Most products available in totes. For alternate packaging, contact ITD.

TECHNICAL INFORMATION

Color	Dark Blue
Odor	Odorless
pH	3 - 4
State	Liquid
DOT	Not Regulated By DOT

Bye Slime manages green debris, slime and algae in swimming pools, which keeps pool water clear and free of visible debris.

DIRECTIONS FOR USE:

Initial Dose: Add 1 quart of Bye Slime to 10,000 gallons of pool water. Maintenance Dose: Add 1 quart to 50,000 gallons of pool water. Initial dose is used when filing pool at beginning of swimming season. If pool has visible coloration, treat with initial dose. Vacuum pool after 24 hours to remove debris. If visible debris are still present or reappear, repeat this treatment procedure as necessary. When pool is free of visible particles, use recommended maintenance dose.

Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently. If make-up water is added at the rate of more than 10% per week of pool capacity, add 1 quart of product for each 10,000 gallons of fresh water added per week. When season is over, add 1 gallon of product to 50,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of green debris during the winter months. Compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other water treating chemicals.
