TECHNICAL INFORMATION

Color	Dark Blue
Odor	Odorless
pH	4 - 6
State	Liquid
DOT	Not Regulated By DOT

Crystal Clear clears up cloudy pool water overnight without disrupting pH balance or other chemical present.

DIRECTIONS FOR USE:

For routine maintenance, use at the rate of 1 quart per 50,000 gallons of water at the end of the day. Add same dosage at least once each week at the point of maximum agitation (usually the inlet of a skimmer opening) or pour around the perimeter of the pool.

Under extreme conditions, use 1 quart per 25,000 gallons of water at the end of the day. When Crystal Clear has completely mixed with the pool water the suspended solids will begin to settle to the sides and bottom of the pool. The following morning, vacuum residue and backwash the filter system to purge the solids from the system.
