

# Hard Ball

## WATER HARDENER

**PRODUCT CODE**  
**90001**

## PACKAGING

Product Code	Size Available	Weight
90001-8#	8 lbs (Pail)	10 lbs.
90001-35#	50 lbs (5 Gallon Pail)	55 lbs.

## TECHNICAL INFORMATION

Color	Blue
Odor	Odorless
pH	N/A
State	Blue Beads
DOT	Not Regulated By DOT

The level of water hardness in pools is an important part of the overall operation of a swimming pool. Lower levels of water hardness create aggressive corrosion and etching on under water masonry surfaces of pools. This process leads to cloudy water and damage to filters. **Hard Ball** makes increasing water hardness quick and easy, thereby preventing damage to pools and improving water clarity.

### DIRECTIONS FOR USE:

To obtain the recommended range of 225-250 ppm, distribute 10 ½ lbs. per 10,000 gallons of water to raise water hardness 100 ppm.

Note: Do not adjust water hardness and total alkalinity the same day clouding could occur.
