TECHNICAL INFORMATION

Color	Green
Odor	Acerbic
pH	<1
State	Liquid
DOT	Hazardous (Hydrochloric Acid, Phosphoric Acid) (Limited Quantity Exemption)

Straight Clean is a safe fast and economical method of removing scum, body oils, suntan lotion and film that have been allowed to accumulate on swimming pool during the winter season. It is also used to clean the chlorinator and remove mineral deposits and metal stains from diving boards and ladders.

Contains no ingredients that will cause harm or danger to bathers when used as directed. Good industrial hygiene calls for adequate ventilation. Carefully rinse and dispose of used container.

DIRECTIONS FOR USE:

Straight Clean may be diluted with up to 3 parts water, depending on the degree of scum and mineral deposits. Pool should be drained and solutions applied to sides of pool with a low pressure, plastic sprayer in approximately 6 foot swaths, working upwards. Allow a few minutes to remain on surface before agitating with nylon pad or brush and rinsing thoroughly before proceeding to next section. Can also be used while pool is full to clean and renovate ceramic tile coping and gutters around edge of pool.
