Private label and INFOTRAC

DOT and OSHA require all hazardous material shipping papers and SDS's to provide a 24-hour emergency response telephone number. ITD provides this service through InfoTrac. InfoTrac is an SDS Management and 24/7 Chemical Emergency Responder. With your SDS on file, calls from end users regarding accidents and emergencies will be handled by InfoTrac.

InfoTrac service is standard on ITD brand products. We offer our private label customers a 40% discounted INFOTRAC service of \$150.00 per year. When your annual chemical purchases with ITD are over \$10,000, ITD will afford the fee.

To be a private label customer there is a one-time \$150.00 fee. The fee includes the product label and S.D.S. with your company's information and one more dilution step of product. If there are more dilutions and steps with the same label product name, there will be a charge of \$80.00 for each of the additions.

We also offer custom label development for a one-time \$300 fee. The fee includes the original product label design as well as the S.D.S options listed above.

If you request S.D.S.'s for products other than ITD manufactured products, we will create those for you for \$250.00 per product.

Once established, should any of your company information need to be changed, there is a \$50.00 charge per occurrence.

INFOTRAC service is revisited and renewed June 1st of each year.

Product labels are @ \$1.50.

Hazard labels (corrosive, flammable, toxic) are @ \$0.25.
